

IIOT for Advanced Manufacturing (ECMC104) - Project Rubric

Total: 50 marks

Interim Report and Assessment (10 marks)

CATEGORY	Max	Excellent (8.0 - 10)	Good (6.5 - 7.9)	Satisfactory (5.0 - 6.4)	Poor (0 - 4.9)
Interim Report and Assessment (Group) - System Design - Task and I/O pin Assignment - Issued Components Patch and Test. (BME280, Relay/5V Fan, Buzzer)	10	Provides detailed information in the architectural diagram.	Provides adequate information in the architectural diagram.	Provides some information in the architectural diagram.	Provides little information in the architectural diagram.
	10	Provides detailed hardware interface information in the pin assignment diagram.	Provides adequate hardware interface information in the pin assignment diagram.	Provides some hardware interface information in the pin assignment diagram.	Provides little hardware interface information in the pin assignment diagram.
	10	All tasks are described with excellent detail.	All tasks are described with moderate detail.	All tasks are described with some detail.	All tasks are described with little or no detail.
	10	Most patching and testing of components done	Moderate patching and testing of components done	Some patching and testing of components done	Little or no patching done

Project Solution (20 marks)

CATEGORY	Max	Excellent (17.5 - 20)	Good (14.0 - 17.4)	Satisfactory (10 - 13.9)	Poor (0 - 9.9)
Solution (Individual) - Hardware - MQTT - Dashboard - Additional Features - Leadership and Teamwork	10	A fully functional solution	Solution is mostly functional	A partially functional solution	A solution with minimum functionality
	10	Highly presentable dashboard	Well presentable dashboard	Partial presentable dashboard	Poorly presented dashboard
	10	A good number of innovative features added	A good number of basic features added	Few basic features added	No additional feature added.
	10	Outstanding leadership and teamwork demonstrated in achieving the final product deliverable	Good leadership and teamwork demonstrated in achieving the final product deliverable	Some leadership and teamwork demonstrated in achieving the final product deliverable	Little to no leadership and teamwork demonstrated

Interview (10 marks)

CATEGORY	Max	Excellent (8.0 - 10)	Good (6.5 - 7.9)	Satisfactory (5.0 - 6.4)	Poor (0 - 4.9)
Presentation AND Q&A (Individual)	10	Very good presentation flow.	Good presentation flow.	Partial presentation flow.	Disjointed presentation flow
	10	Gives clear and detailed explanation to demonstrate full understanding of work done.	Gives clear and sufficient explanation to demonstrate good understanding of work	Gives partial explanation to demonstrate partial understanding of work done.	Gives unclear explanation of work done with little or no understanding of work done.

Final Documentation (10 marks)

CATEGORY	Max	Excellent (8.0 - 10)	Good (6.5 - 7.9)	Satisfactory (5.0 - 6.4)	Poor (0 - 4.9)
Final Report (Group) - Update from Interim - System Architecture - Project Plan Individual Reflection (Individual)	10	Information is well organized with well-constructed paragraphs and subheadings	Information is organized with constructed paragraphs and subheadings	Information is organized with partially-constructed paragraphs and subheadings.	Information is not organized with poorly constructed paragraphs and subheadings
	10	All sections of the report are well elaborated.	Most sections of the report are well elaborated.	Some sections of the report are well elaborated.	Few sections of the report are well elaborated.
	10	Project plan reflected well on the project development process.	Project plan reflected reasonably well on the project development process.	Project plan reflected partially well on the project development process.	Project plan reflected poorly on the project development process.
	10	Clear and focused reflection of knowledge and assumptions, while articulating new perspectives.	Reasonable reflections of knowledge and assumptions, while articulating new perspectives.	General reflections of knowledge and assumptions.	Unclear and vague reflections of knowledge and assumptions.
